*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

505-509 Oak St. is located on a 28' x 120' through-block lot on the south side of Oak Street, between Buchanan and Webster Streets. Built circa 1895, 505-509 Oak St is a 3-story, wood frame, multiple family dwelling containing 2 flats designed in the Queen Anne style. The rectangular-plan building, clad in wood, shiplap siding, is capped by a flat roof. The foundation is not visible. The primary façade faces north and is 2 bays wide. The ground floor features a garage in the left bay, and the right bay contains a straight flight of wood steps leading to the main entrance on the second story. The main entrance is sheltered inside a recessed entry porch with turned posts, lattice spindle balustrade, and lattice spindle screen with a curvilinear entrance arch. The building has two entrances fitted with glazed, paneled wood doors with transoms. The left bay contains a semi-hexagonal bay window with double-hung, Queen Anne sash and bulls eye ornament on the spandrel panel. A frieze with swag ornament separates the second and third stories. The third story has a bay window in the left bay with block ornament on the spandrel panel and double-hung, Queen Anne sash. The right bay is set flush with the front face of the bay window and has a single double-hung, wood window with Queen Anne sash. The primary facade terminates in a frieze with curvilinear vine ornament, brackets dividing the bays, and a false gable in the left bay. The gable has shaped verge boards, a low spindle balustrade, bulls eye block paneling, and a centered panel molded to look like a small, four-light window. A pent roof clad in asphalt shingles extends to the west end of the façade. The building appears to be in good condition.
