e. Other Locational Data: Assessor's Parcel Number (Map, Block, Lot): 0830-009

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

436 Oak St. is located on a 34.38' x 120' through-block lot on the north side of Oak Street, between Buchanan and Laguna Streets. The building is set back from the street on a lot enclosed with a tall, modern wood fence clad in stucco. A gate with double-leaf, paneled wood doors, engaged fluted columns, and pediment with dentils and bracketed, paneled frieze is set off-center to the west. Built circa 1910, 436 Oak St is a two-story, wood frame, single family building designed in the Stick/Eastlake style. The rectangular-plan building, clad in drop wood siding is capped by a flat roof. The primary façade faces south and is three bays wide. The façade steps back from the street in each successive bay. Lot fencing obscures the ground story. The second story is characterized by a squared bay window in the left bay with three arched, double-hung, wood windows with keystones. The bay window has spandrel panels separated reeded boards; an entablature with bezant frieze; bracketed, dentil cornice; and hipped roof with three contiguous arches with dentils and pierced decoration. The center bay contains an entry porch accessed via a flight of wood steps with turned balustrade. The porch has a single Corinthian column support and three Corinthian (continued)

P3a. Description, continued:
pilasters supporting an entablature with bezant frieze and bracketed dentil cornice. The porch shelters a single entrance with glazed, paneled, wood door below a transom. The right bay contains a single arched, double-hung, wood window. The façade terminates in an entablature with paneled frieze and bracketed dentil cornice. The cornice is broken above the bay window to form a pediment with dentils and pierced decoration in the gable. The building appears to be in good condition.

Primary façade, alternate view.
