*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

155 Buchanan St. is located on a 29' x 90' lot on the west side of Buchanan Street, between Hermann and Waller Streets. Built in 1917, 155 Buchanan St is a 3-story, wood frame, multiple family residence containing 2 flats designed in the Colonial Revival style. The rectangular-plan building, clad in flush wood siding, is capped by a hip roof. The foundation is not visible from the street. The primary façade faces east and is 2 bays wide. The right bay is wider and set flush with the front lot line, while the left bay is narrower and set back from the street. The ground floor features two garages in the right bay and a straight run of terrazzo steps with concrete parapet wall and pipe handrails in the left bay, leading to the main entrance on the first story. The left bay of the first story contains an enclosed, recessed porch and the main entrance to the building, fitted with a modern wood door and sidelight. The right bay features a bow window on brackets with double-hung, wood sash, an entablature, and turned balustrade on the third story. An intermediary entablature divides the first and second stories. The left bay of the second story features a small double-hung wood window, while the right bay features a Palladian window with central fixed sash, side double-hung wood sash, and fan light. The primary facade terminates in an entablature with an egg and dart and dentil cornice. A sky light is set on the front slope of the hipped roof in the left bay. The exposed south elevation features a bay window with spandrel panels on the first story and double-hung wood sash in the remaining bays. The building appears to be in good condition.
