*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

551-553 Oak St. is located on a 27.50' x 71' lot on the south side of Oak Street, between Buchanan and Webster Streets. Built circa 1890, 551-553 Oak St is a 2-story, wood frame, multiple family residence designed in the Stick/Eastlake style. The rectangular-plan building, clad in drop wood siding, sits on a brick perimeter foundation and is capped by a flat roof. The primary façade faces north and is 2 bays wide. The left bay of the first story features a rectangular bay window that rises through the second story. The windows contain double-hung metal sashes and ornament that includes pilasters, paneled friezes, bead and reel molding, and intermediary cornices. The right bay of the first story features concrete steps with wood balustrades, and an entrance crowned by a bracketed entablature identical to those on the bay window. The entrance contains two recessed, glazed and paneled wood doors and transoms. The right bay of the second story features a double-hung window with sash and ornament identical to those on the bay window. The primary facade terminates in a molded architrave, paneled frieze, bracketed cornice, and a shingled false parapet. The site features a concrete block wall and iron fence. A metal chimney is visible above the west elevation. The building appears to be in good condition.
