*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

331-333 Page St. is located on a 25' x 137.50' lot on the south side of Page Street, between Laguna St. and Buchanan St. Streets. Built circa 1905, 331-333 Page St is a 3-story, wood frame, multiple family residence designed in the Italianate style. The rectangular-plan building, clad in horizontal drop and flush wood siding, is capped by a flat roof. The foundation is not visible. The primary façade faces north and is 2 bays wide. The ground floor of the primary façade features concrete stairs in the left bay that are scored and rusticated to resemble ashlar masonry. The stairs lead to an entrance on the second story. The right bay, clad in horizontal drop wood siding, contains a garage entrance with overhead garage door and three four-light transoms. The left bay of the second story contains a recessed, paneled entrance that is flanked by Ionic columns, in antis. An arch with bull's eye molding surrounds the entrance, which contains two glazed wood doors with transoms and crossette molding. An engaged colonnette separates the doors. The right bay contains a semi-hexagonal bay window with double-hung, wood sash windows. Engaged Ionic columns frame the center window. The third story, clad in flush wood siding, contains a double-hung, wood sash window with crossette molding and Ionic columns in the left bay. The right bay contains a semi-hexagonal bay window with sashes and ornament identical to that in the left bay. The primary facade terminates in a molded architrave, frieze, and cornice with egg-and-dart and dentil moldings and modillions. The building appears to be in good condition.
