*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

17-19 Laussat Street is located on a 30' x 43.5' lot on the south side of Laussat Street near the Buchanan Street intersection. 17-19 Laussat Street is a 2-story-over-basement, wood-frame residential flat building designed in the Italianate style. The rectangular-plan building is clad in wood shiplap siding and is capped by a flat roof. It sits on a high foundation that is clad with scored and textured parging. This basement level has small one-over-one wood windows and a flush wood entry door at each of corner of the building. A prominent water table divides the basement level from the wall above, which also has corner boards. At the center of the front façade is the primary entry, which consists of two wood panel doors surmounted by transoms within an inset vestibule. The interior of the vestibule is clad in vertical wood board with a chair rail. The opening of the vestibule is a shallow Tudor arch capped by a bracketed hood. The primary window type on the front façade is a one-over-one, wood, double-hung sash surrounded by a decorative frame and hood. The front façade is capped by a prominent entablature consisting of a paneled frieze, dentil molding, brackets and small overhanging cornice. This building appears to be in excellent condition.
