*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

290-292 Page Street is located on a 27.5' x 62.25' lot on the north side of Page Street, between Laguna and Octavia Streets. Built in 1890, 290-292 Page Street is a three-story, wood frame, three-unit multiple-family residential building designed in the Italianate style. The rectangular-plan building is clad in horizontal drop wood siding and capped by a gable roof. Its foundation is not visible from the street. The primary façade faces south and is two bays wide. The typical fenestration consists of arched double-hung wood windows with molded surrounds and sculpted spandrel panels. The left bay of the second floor features a recessed entrance approached by concrete steps with wood-turned newell posts and balusters. This entrance features a portico with turned posts, a thin entablature, cornice, and non-historic balustrade. This entrance consists of a double-leaf, single-light glazed, wood door with molded surrounds and an arched transom. Above the portico in the left bay of the third floor are paired double-hung windows with an arched window shield and projecting window hood. The right bay is occupied by a three-story, semi-hexagonal bay window with window shields, arched surrounds, dentils at the lower level, and colonnettes at the upper level. The ground floorof the right bay contains a service door. The primary facade terminates in a parapet wall articulated with a broad entablature, panel molding, brackets, bracket extensions, and a projecting cornice. The building appears to be in good condition.
