*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

176-178 Haight Street is located on a 27.5' x 64.9' lot on the north side of Haight Street, between Laguna and Octavia Streets. Built ca. 1885, 176-178 Haight Street is a 2.5-story, wood frame, two-unit multiple-family residence designed in the Queen Anne style. The highly ornate façade has Stick/Eastlake influences and is rectangular in plan. The building is clad in horizontal drop wood siding on the ground floor and wood shingles on the second floor and is capped by a combination hip roof. Its foundation is not visible from the street. The primary façade faces south; is two bays wide; and is partially obscured by two trees. The left bay of the first floor features a recessed entry porch with a flat door hood supported by brackets and bracket extensions. This entry contains two wood-panel doors with molded surrounds and transoms. In the right bay of the first floor is a two-story box bay window, which is capped by a gable roof featuring a weather vane finial, verge board decorations, and an arched entablature. This bay window is adorned with spandrel panels, panel molding, and brackets with bracket extensions. Adjacent to this bay window, in the left bay of the second floor are two double-hung wood windows with sculpted sill panels, molded surrounds, leaded glass transoms, an entablature with ornamental molding, and a cornice supported by two large brackets. The primary facade terminates in a hip roof detailed with a wide paneled entablature, half timbering, and ornate brackets. Along the east façade is a secondary shallow recessed bay distinguished by sculpted panels and colored glass. The building appears to be in good condition.
