*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

434-436 Page St. is located on a 27' x 66' lot on the north side of Page Street, between Webster and Buchanan Streets. Built in 1890, 434-436 Page St is a 3-story, wood frame, multiple family residence designed in the Italianate style. The rectangular-plan building, clad in V-notch wood siding and fish scale shingles, sits on a reinforced concrete, perimeter foundation and is capped by a gable roof. The primary façade faces south and is 2 bays wide. The elevation is framed by paneled corner boards. The ground floor features wood steps with a turned balustrade in the left bay leading to a recessed entrance on the second story. The right bay contains a garage entrance with overhead door. The left bay of the second story contains a recessed and paneled entrance with two glazed wood doors with arched transoms. A bracketed hood and awning shelter the entrance. The right bay contains a semi-hexagonal bay window that rises through the third story. The bay window has double-hung, arched wood windows; Corinthian colonettes, and entablatures with paneled friezes and bracketed cornices. The third story contains an arched, double-hung wood window in the left bay with bulls eye corner blocks and a bracketed, arched pediment hood. The bay window in the right bay is identical to that on the first story. (continued)

P3a. Description, continued:
The primary façade terminates in fish scale shingle cladding, a molded architrave, paneled frieze, bracketed cornice, and pent roof clad in fish scale shingles. A single bay of an offset rear block is visible to the right of the façade and contains two double-hung windows with architrave surrounds and floral ornament. The building appears to be in good condition.
