*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

11 Laussat Street is located on a 25' x 50' lot on the south side of Laussat Street near the Buchanan Street intersection. 11 Laussat Street is a 2-story, wood-frame residential flat building designed in the Stick/Eastlake style. The complex-plan building is clad in wood channel drop siding and is capped by a flat roof. A pent roof covered in asphalt shingles is located at the top of the wall. A square bay window projects from the east side of the front façade and spans both stories. The primary window type on the house is a one-over-one, wood sash with lambs tongues. The windows are paired and at the second story level have leaded glass in the upper sash. The primary entries to the building are located at the west side of the front façade and consists of two glazed wood panel doors with large transoms that are located within an inset porch. Decorative details on the front facade include a water table and corner boards, fluted pilasters and brackets around door and window openings, decorative wall panels below the windows on the projecting bay, and a prominent cornice with heavy moldings, a paneled frieze, and brackets surmounted by the pent roof. This building appears to be in excellent condition.
