*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

350 Page St. is located on a 25' x 120' through lot on the north side of Page Street, between Buchanan and Laguna Streets. Built circa 1910, 350 Page St is a 2-story, wood frame, single family residence designed in the Classical Revival style. The rectangular-plan building, clad in flush wood siding, sits on a reinforced concrete perimeter foundation and is capped by a hip roof. The site features an iron fence above a simulated masonry wall, and concrete stairs that lead to the entrance. The primary façade faces south and is 2 bays wide. The left bay of the first floor features an arched double-hung wood-sash window with an ovoid-pattern muntin in the upper sash. This window is framed by fluted pilasters and crowned with egg-and-dart molding. The right bay of the first floor contains a recessed paneled entrance, flanked by fluted Ionic columns and crowned with an arched egg-and-dart molding, which features a door hood with pilasters and modillion blocks. The entrance contains a glazed wood door with sidelights and transom. The second story contains a wide semi-hexagonal bay window in the left bay, a small double-hung window with wood sashes in the center, and a single window in the right bay. The windows in the left and right bays are double-hung with wood sashes and are framed with crossette molding. The upper sashes of these windows also contain ovoid-pattern muntins. The primary facade terminates in a molded architrave, frieze, and modillioned cornice. The building appears to be in good condition.
