DATE: December 2, 2015
TO: Philip Lesser, TNN Properties
FROM: Lisa Gibson, Planning Department
RE: PPA Case No. 2015-011215PPA for 340 Division Street

Please find the attached Preliminary Project Assessment (PPA) for the address listed above. You may contact the staff contact, Chris Thomas, at (415) 575-9036 or christopher.thomas@sfgov.org, to answer any questions you may have, or to schedule a follow-up meeting.

Lisa Gibson, Senior Planner
Preliminary Project Assessment

**Date:** December 4, 2015  
**Case No.:** 2015-011215PPA  
**Project Address:** 340 Division Street  
**Block/Lot:** 3528/007  
**Zoning:**  
SALI (Service/Arts/Light Industrial) District  
**Area Plan:** Western SoMa  
**Project Sponsor:** Philip Lesser  
650-347-6014  
**Staff Contact:** Chris Thomas – 415-575-9036  
christopher.thomas@sfgov.org

**DISCLAIMERS:**

This Preliminary Project Assessment (PPA) letter provides feedback to the project sponsor from the Planning Department regarding the proposed project described in the PPA application submitted on August 31, 2015, as summarized below. This PPA letter identifies Planning Department review requirements for the proposed project, including those related to environmental review, approvals, neighborhood notification and public outreach, the Planning Code, project design, and other general issues of concern for the project. Please be advised that the PPA application does not constitute an application for development with the Planning Department. The PPA letter also does not represent a complete review of the proposed project, does not grant a project approval of any kind, and does not in any way supersede any required Planning Department approvals listed below.

The Planning Department may provide additional comments regarding the proposed project once the required applications listed below are submitted. While some approvals are granted by the Planning Department, some are at the discretion of other bodies, such as the Planning Commission or Historic Preservation Commission. Additionally, it is likely that the project will require approvals from other City agencies such as the Department of Building Inspection, Public Works, the Municipal Transportation Agency, Department of Public Health, San Francisco Public Utilities Commission, and others. The information included herein is based on the PPA application and plans, the Planning Code, General Plan, Planning Department policies, and local/state/federal regulations as of the date of this document, all of which are subject to change.

**PROJECT DESCRIPTION:**

The proposed project would entail demolition of an existing 1,394-square-foot (sf) office building built in 1952 and construction of a four-story, approximately 40-foot-high (48-foot-high with elevator penthouse), 16,550-gross-square-foot (gsf) building. The ground floor would contain 2,797-sf of retail space, the second and third floors would contain about 3,256-sf each for trade shop use, and the fourth floor would contain about 3,256-sf of administrative space accessory to the trade shop use, for a total of about 12,565...
The August 10, 2015 Letter of Determination from the San Francisco Planning Department to Philipp Lesser notes that “[t]he proposed four-story structure would include offices over a ground floor space to be used for parking, storage, and temporary staging of materials to be used at job sites throughout San Francisco.” No off-street parking or loading would be provided. Four Class II bicycle parking spaces would be provided on Division Street at the entrance to the Sales & Services area.

BACKGROUND:

The project site is within the Western SoMa Community Plan area. The Western SoMa Community Plan covers two connected areas: one (“north of Harrison Street”) roughly bounded by 13th, Bryant, Seventh and Minna Streets; and the second (“south of Harrison Street”) roughly bounded by Townsend, Fourth, Harrison and Seventh Streets. The Western SoMa Community Plan and its associated rezoning became effective April 27, 2013. A programmatic environmental impact report for the Western SoMa Community Plan (Western SoMa PEIR), including mitigation measures, was certified by the Planning Commission on December 6, 2012.1

ENVIRONMENTAL REVIEW:

Community Plan Exemption

Section 15183 of the California Environmental Quality Act (CEQA) Guidelines states that projects that are consistent with the development density established by a community plan for which an environmental impact report (EIR) was certified do not require additional environmental review, except as necessary to determine the presence of project-specific significant effects not identified in the programmatic plan area EIR.

As discussed above, the proposed project is located within the Western SoMa Community Plan area, which was evaluated in the Western SoMa PEIR. If the proposed project is consistent with the development density identified in the area plan, it would be eligible for a community plan exemption (CPE). Please note that a CPE is a type of exemption from environmental review, and cannot be modified to reflect changes to a project after approval. Proposed increases beyond the CPE project description in project size or intensity after project approval will require reconsideration of environmental impacts and issuance of a new CEQA determination.

Within the CPE process, there can be three different outcomes as follows:

1. CPE Only. All potentially significant project-specific and cumulatively considerable environmental impacts are fully consistent with significant impacts identified in the Western SoMa PEIR, and there would be no new "peculiar" significant impacts unique to the proposed project. In these situations, all pertinent mitigation measures and CEQA findings from the Western SoMa PEIR are applied to the proposed project, and a CPE checklist and certificate is prepared. With this outcome, the applicable fees are: (a) the CPE determination fee (currently $13,659) and (b) the CPE certificate fee (currently $7,580).

2. **Mitigated Negative Declaration.** If new site- or project-specific significant impacts are identified for the proposed project that were not identified in the *Western SoMa PEIR*, and if these new significant impacts can be mitigated to a less-than-significant level, then a focused mitigated negative declaration is prepared to address these impacts, and a supporting CPE checklist is prepared to address all other impacts that were encompassed by the *Western SoMa PEIR*, with all pertinent mitigation measures and CEQA findings from the *Western SoMa PEIR* also applied to the proposed project. With this outcome, the applicable fees are: (a) the CPE determination fee (currently $13,659) and (b) the standard environmental evaluation fee (which is based on construction value).

3. **Focused EIR.** If any new site- or project-specific significant impacts cannot be mitigated to a less-than-significant level, then a focused EIR is prepared to address these impacts, and a supporting CPE checklist is prepared to address all other impacts that were encompassed by the *Western SoMa PEIR*, with all pertinent mitigation measures and CEQA findings from the *Western SoMa PEIR* also applied to the proposed project. With this outcome, the applicable fees are: (a) the CPE determination fee (currently $13,659); (b) the standard environmental evaluation fee (which is based on construction value); and (c) one-half of the standard EIR fee (which is also based on construction value). An EIR must be prepared by an environmental consultant from the Planning Department’s environmental consultant pool ([http://www.sfplanning.org/ftp/files/MEA/Environmental_consultant_pool.pdf](http://www.sfplanning.org/ftp/files/MEA/Environmental_consultant_pool.pdf)). The Planning Department will provide more detail to the project sponsor regarding the EIR process should this level of environmental review be required.

In order to begin formal environmental review, please submit an **Environmental Evaluation Application (EEA)**. The environmental review may be done in conjunction with the required approvals listed below, but must be completed before any project approval may be granted. **Note that until an entitlement application is submitted to the Current Planning Division, only the proposed Project Description will be reviewed by the assigned Environmental Coordinator.** EEAIs are available in the Planning Department lobby at 1650 Mission Street, Suite 400, at the Planning Information Center at 1660 Mission Street, and online at [www.sfplanning.org](http://www.sfplanning.org) under the “Publications” tab. See “Environmental Applications” on page 2 of the current Fee Schedule for a calculation of environmental application fees.

A detailed and accurate project description is essential for adequate environmental review. Please ensure that the EEA includes a description of the anticipated activities that would occur on each of the four floors (in particular, and if known, retail on the ground floor), and confirm the number of expected employees. Transportation planning staff have also requested clarification on what the actual “service area” use would be. Please also include in the EEA additional information as requested below under topics such as archeological resources, transportation and air quality.

Below is a list of topic areas addressed through the environmental review process. Some of these would require additional study based on the preliminary review of the project as it is proposed in the PPA application.

---

1. **Historic Resources.** The existing building on the project site was previously evaluated in the Western SOMA and Showplace Square Historic Resources Surveys and found ineligible for national, state, or local listing. Thus, the proposed project is not subject to review by the Department’s Historic Preservation staff; no additional analysis of historic architectural resources is required.

2. **Archeological Resources.** The proposed project will require Preliminary Archeological Review (PAR) by a Planning Department archeologist. To aid this review the Department archeologist may request a Preliminary Archeological Sensitivity Assessment (PASS) by a Department Qualified Archeological Consultant, subject to the review and approval by the Department archeologist. The Department archeologist will provide three names from the Qualified Archeological Consultant list if the PASS is required. The PAR will assess the archeological sensitivity of the project site based on in-house source material and will consider the potential for archeological impacts resulting from proposed soils disturbance. The PPA application states that the depth of excavation would be about six feet with less than 50 cubic yards excavated. However, the PPA application also indicates that pile and pile caps will be part of the proposed structure’s foundation. Please provide detailed information, including sections, proposed soils-disturbing activities, such as grading, excavation, installation of foundations, soils improvement, and site remediation in the EEA, and submit any available geotechnical/soils or Phase II hazardous materials reports prepared for the project to assist in this review. If the Department archeologist determines that the project has a potential to adversely affect archeological resources, the PAR will identify additional measures needed to address the potential effect. These measures may include preparation of an archeological research design and treatment plan, implementation of one of the Planning Department’s three standard archeological mitigation measures (archeological testing, monitoring, or accidental discovery), or other appropriate measures.

3. **Tribal Cultural Resources.** Tribal cultural resources (TCRs) are a class of resource established under the California Environmental Quality Act (CEQA) in 2015. TCRs are defined as a site, feature, place, cultural landscape, sacred place or object with cultural value to a California Native American tribe, that is either included on or eligible for inclusion in the California Register of Historical Resources or a local historic register, or is a resource that the lead agency, at its discretion and supported by substantial evidence, determines is a TCR. Planning Department staff will review the proposed project to determine if it may cause an adverse effect to a TCR; this will occur in tandem with preliminary archeological review. No additional information is needed from the project sponsor at this time. Consultation with California Native American tribes regarding TCRs may be required at the request of the tribes. If staff determines that the proposed project may have a potential significant adverse impact on a TCR, mitigation measures will be identified and required. Mitigation measures may include avoidance, protection, or preservation of the TCR and development of interpretation and public education and artistic programs.

4. **Transportation.** Based on the PPA submittal, a transportation impact study is not anticipated to be required; however, an official determination will be made subsequent to submittal of the EEA. The project site is located on a high injury corridor as mapped by Vision Zero.³ In consideration of the safety of persons walking and cycling to and from project site and vicinity, please revise the site plans to show dimensions of existing curb cuts and highlight curb cut removal as part of project.

5. **Noise.** The project site is located in an area where traffic-related noise exceeds 60 dBA Ldn; however, the proposed project would not include sensitive receptors (residences, schools, child care, religious and convalescent facilities, etc.) and would therefore not be subject to *Western SoMa PEIR* noise Mitigation Measures M-NO-1a (Interior Noise Levels for Residential Uses), M-NO-1b (Siting of Noise-Sensitive Uses) or M-NO-1d (Open Space in Noisy Environments). Given the project description provided to date, it does not appear that the proposed project involves noise-generating uses and, therefore, would not be subject to Mitigation Measure M-NO-1c (Siting of Noise-Generating Uses). The proposed project would be subject to Mitigation Measure M-NO-2a (General Construction Noise Control Measures). If pile driving would be involved, the proposed project would also be subject to Mitigation Measure M-NO-2b (Noise Control Measures During Pile Driving). The EEA application should indicate the estimated duration of construction and whether pile driving or other particularly noisy construction methods are required.

6. **Air Quality.** The proposed project’s size at 16,550-gsf is below the Bay Area Air Quality Management District’s (BAAQMD) construction screening levels for criteria air pollutants. Therefore, an analysis of the project’s criteria air pollutant emissions is not likely to be required.

   Project-related demolition, excavation, grading and other construction activities may cause wind-blown dust that could contribute particulate matter into the local atmosphere. To reduce construction dust impacts, the proposed project will be required to adhere to the dust control requirements set forth in the Construction Dust Ordinance contained in San Francisco Health Code Article 22B and San Francisco Building Code Section 106.A.3.2.6.

   The project site is also located within an Air Pollutant Exposure Zone, as mapped and defined by Health Code, Article 38. The Air Pollutant Exposure Zone identifies areas with poor air quality based on modeling of air pollution, exposures, and health vulnerability from mobile, stationary, and area source emissions within San Francisco. However, because the project does not propose to construct new sensitive land use (e.g., residential), it would not be subject to enhanced ventilation measures pursuant to Health Code Article 38 and submission of an Article 38 application to DPH prior to the issuance of any environmental determination would not be necessary.

   Equipment exhaust control measures during construction will likely be required. Please provide detailed information related to construction equipment, phasing and duration of each phase, and the volume of excavation as part of the EEA.

   If the project would generate new sources of toxic air contaminants including, but not limited to, diesel generators or boilers, or any other stationary sources, the project would result in toxic air contaminants that may affect both on-site and off-site sensitive receptors. Please provide detailed information related to any proposed stationary sources with the EEA.

7. **Greenhouse Gases.** *The City and County of San Francisco’s Strategies to Address Greenhouse Gas Emissions* presents a comprehensive assessment of policies, programs, and ordinances that represents San Francisco’s Qualified Greenhouse Gas (GHG) Reduction Strategy. Projects that are consistent
with San Francisco’s Qualified GHG Reduction Strategy would result in less-than-significant impacts from GHG emissions. In order to facilitate a determination of compliance with San Francisco’s Qualified GHG Reduction Strategy, the Planning Department has prepared a Greenhouse Gas Analysis Compliance Checklist. The project sponsor may be required to submit the completed table regarding project compliance with the identified regulations and provide project-level details in the discussion column. This information will be reviewed by the environmental planner during the environmental review process to determine if the project would comply with San Francisco’s Greenhouse Gas Reduction Strategy. Projects that do not comply with an ordinance or regulation may be determined to be inconsistent with the Greenhouse Gas Reduction Strategy.

8. **Wind.** The proposed project would not involve construction of a building over 80 feet in height. Therefore, a wind analysis would not be required.

9. **Shadow.** The proposed project would result in construction of a building 40 feet in height. A preliminary shadow analysis prepared by Planning Department staff indicates that the proposed project would not cast shadows on any Department of Recreation and Parks property or any other open space. Therefore, a detailed shadow study would not be required.

10. **Geology.** The project site is located within a Seismic Hazard Zone (a Liquefaction Hazard Zone likely underlain by artificial fill). Any new construction on the site is therefore subject to a mandatory Interdepartmental Project Review. A geotechnical study prepared by a qualified consultant must be submitted with the EEA. The study should address whether the site is subject to liquefaction, and should provide recommendations for any geotechnical concerns identified in the study. In general, compliance with the building codes would avoid the potential for significant impacts related to structural damage, ground subsidence, liquefaction, and surface settlement. To assist Planning Department staff in determining whether the project would result in environmental impacts related to geological hazards, it is recommended that you provide a copy of the geotechnical information with boring logs for the proposed project. This study will also help inform the Planning Department Archeologist of the project site’s subsurface geological conditions.

11. **Hazardous Materials.** The proposed site is located in an area with potentially contaminated soils as indicated by the Department of Public Health’s Maher Map. According to the PPA Application, less than 50 cubic yards of excavation would be required. Please confirm the volume and depth of excavation necessary for construction of the proposed project in the EEA. If the amount of excavation is greater than 50 cubic yards, or if otherwise determined by the Department of Public Health, the proposed project may be subject to Article 22A of the Health Code, also known as the Maher Ordinance. The Maher Ordinance, which is administered and overseen by the Department of Public Health (DPH), requires the project sponsor to retain the services of a qualified professional to prepare a Phase I Environmental Site Assessment (ESA) that meets the requirements of Health Code Section

---

22.A.6. The Phase I ESA would determine the potential for site contamination and level of exposure risk associated with the project. Based on that information, soil and/or groundwater sampling and analysis, as well as remediation of any site contamination, may be required. If these steps are required, they must be completed prior to the issuance of any building permit.

DPH requires that projects subject to the Maher Ordinance complete a Maher Application, available at: http://www.sfdph.org/dph/EH/HazWaste/hazWasteSiteMitigation.asp. Fees for DPH review and oversight of projects subject to the ordinance would apply. Please refer to DPH's fee schedule, available at: http://www.sfdph.org/dph/EH/Fees.asp#haz. Please provide a copy of the submitted Maher Application and Phase I ESA with the EEA.

Western SoMa PEIR Mitigation Measure M-HZ-2 (Hazardous Building Materials Abatement) would be applicable to the proposed project because it involves demolition of a building constructed in 1952 in which hazardous building materials may be present. The mitigation measure requires that the project sponsor ensure that any equipment containing polychlorinated biphenyls (PCBs) or di(2-ethylhexyl) phthalate (DEPH), such as fluorescent light ballasts, and any fluorescent light tubes containing mercury be removed and properly disposed of in accordance with applicable federal, state, and local laws. In addition, any other hazardous materials identified, either before or during work, must be abated according to applicable federal, state, and local laws.

Because the existing building was constructed prior to 1980, asbestos-containing materials, such as floor and wall coverings, may be found in the building. The Bay Area Air Quality Management District (BAAQMD) is responsible for regulating airborne pollutants including asbestos. Please contact BAAQMD for the requirements related to demolition of buildings with asbestos-containing materials. In addition, because of its age (constructed prior to 1978), lead paint may be found in the existing building. Please contact the San Francisco Department of Building Inspection (DBI) for requirements related to the demolition of buildings that may contain lead paint.

12. **Tree Planting and Protection.** The Department of Public Works Code Section 8.02-8.11 requires disclosure and protection of landmark, significant, and street trees located on private and public property. Any such trees must be shown on the site plans with the size of the trunk diameter, tree height, and accurate canopy drip line. Please submit the *Tree Planting and Protection Checklist* with the EEA and ensure that trees are appropriately shown on site plans. Also see the comments below under “Street Trees.”

13. **Disclosure Report for Developers of Major City Projects.** The San Francisco Ethics Commission S.F. Camp. & Govt. Conduct Code § 3.520 et seq. requires developers to provide the public with information about donations that developers make to nonprofit organizations that may communicate with the City and County regarding major development projects. This report must be completed and filed by the developer of any “major project.” A major project is a real estate development project located in the City and County of San Francisco with estimated construction costs exceeding $1,000,000 where either: (1) The Planning Commission or any other local lead agency certifies an EIR for the project; or (2) The project relies on a program EIR and the Planning Department, Planning Commission, or any other local lead agency adopts any final environmental determination under CEQA. A final environmental determination includes: the issuance of a Community Plan Exemtion
(CPE); certification of a CPE/EIR; adoption of a CPE/Final Mitigated Negative Declaration; or a project approval by the Planning Commission that adopts CEQA Findings. (In instances where more than one of the preceding determinations occur, the filing requirement shall be triggered by the earliest such determination.) A major project does not include a residential development project with four or fewer dwelling units. The first (or initial) report must be filed within 30 days of the date the Planning Commission (or any other local lead agency) certifies the EIR for that project or, for a major project relying on a program EIR, within 30 days of the date that the Planning Department, Planning Commission, or any other local lead agency adopts a final environmental determination under CEQA. Please submit a Disclosure Report for Developers of Major City Projects to the San Francisco Ethics Commission. This form can be found at the Planning Department or online at http://www.sfethics.org.

PLANNING DEPARTMENT APPROVALS:

The project requires the following Planning Department approvals. These approvals may be reviewed in conjunction with the required environmental review, but may not be granted until after the required environmental review is completed.

1. Pursuant to Planning Code Section 305, and as discussed under “Preliminary Project Comments” below, a Variance from the Zoning Administrator is required if the project does not comply with any of the specified Code sections.
   - A Variance is required to allow the proposed mix of commercial uses to not satisfy the minimum square footage of required usable open space.
   - A Variance is required to allow commercial frontage which does not comply with the requirements of Planning Code Section 145.1.

2. A Building Permit Application is required for the demolition of the existing building on the subject property.

3. A Building Permit Application is required for the proposed new construction on the subject property.

Building Permit applications are available at the Department of Building Inspection at 1660 Mission Street.

NEIGHBORHOOD NOTIFICATIONS AND PUBLIC OUTREACH:

Project sponsors are encouraged, and in some cases required, to conduct public outreach with the surrounding community and neighborhood groups early in the development process. Additionally, many approvals require a public hearing with an associated neighborhood notification. Differing levels of neighborhood notification are mandatory for some or all of the reviews and approvals listed above.

This project is required to conduct a Pre-Application meeting with surrounding neighbors and registered neighborhood groups before a development application may be filed with the Planning Department.
Pre-Application packet, which includes instructions and template forms, is available at www.sfplanning.org under the “Permits & Zoning” tab. All registered neighborhood group mailing lists are available online at www.sfplanning.org under the “Resource Center” tab.

Notification of a Project Receiving Environmental Review. Notice may be required to be sent to occupants of the project site and properties adjacent to the project site, as well as to owners and, to the extent feasible, occupants of properties within 300 feet of the project site at the initiation of the environmental review process. Upon request, please be prepared to provide mailing addresses on a CD during the environmental review process.

PRELIMINARY PROJECT COMMENTS:

The following comments address specific Planning Code and other general issues that may substantially impact the proposed project.

Western SoMa Community Plan. The subject property falls within the area covered by the Western SoMa Community Plan, a part of the Eastern Neighborhoods Area Plan in the General Plan. As proposed, the project is generally consistent with the overarching objectives of the Plan, though the project and design comments below discuss any items where more information is needed to assess conformity with either specific policies or Code standards or where the project requires minor modification to achieve consistency. The project sponsor is encouraged to read the full plan, which can be viewed at: http://www.sf-planning.org/ftp/General Plan/Western SoMa Area Plan.pdf

The following comments address specific Planning Code and other general issues that may substantially impact the proposed project.

1. **Interdepartmental Project Review.** This review is required for all proposed new construction in seismic hazard zones, in which the subject property falls. An application is enclosed.

2. **Neighborhood Notification.** This project is subject to neighborhood notification as required by Planning Code Section 312.

3. **Architectural Drawings.** The submittal did not include architectural sections, detailed elevations or separated floor plans of each floors. The proposed drawings should comply with the Department’s Plan Submittal Guidelines, which are available for download from the Department’s website.

4. **Uses.** Please indicate the total floor area occupied by each proposed use on the floor plans.

5. **Open Space – Non-Residential.** Section 135.3 requires this project to provide Usable Open Space. Additional details regarding the proposed open space will be required to ensure that the dimensional requirements are met. Additionally, Planning Code Section 823(c)(2)(B) (Western SoMa SUD-Controls-Open Space-Roof Decks) does not allow roof decks to qualify as required private or common usable open space. Alternatively, per Section 426, an in-lieu fee may be paid instead of providing the open space on site and pursuant to administrative review by the Zoning Administrator per Section 307(h)(1)A.
6. **Street Frontages.** Planning Code Section 145 includes a number of Code requirements intended to preserve, enhance and promote attractive, pedestrian oriented street frontages. Based on the preliminary elevations and drawings, it appears that the project will not meet these Code requirements. Please provide detailed architectural plans that specify the materials, colors and finishes of the project in order to determine whether the project satisfies this Code section. Additionally, the proposed location of the trash enclosure would not be permitted along the subject frontage. Please relocate the trash enclosure to comply with Planning Code Section 145.1(b)2, or alternatively a Variance may be sought.

7. **Bird Safety.** Planning Code Section 139 (Standards for Bird-Safe Buildings) outlines bird-safe standards for new construction to reduce bird mortality from circumstances that are known to pose a high risk to birds and are considered to be "bird hazards." Feature-related hazards may create increased risk to birds and need to be mitigated. Any feature-related hazards, such as free-standing glass walls, wind barriers, or balconies must have broken glazed segments 24 square feet or larger in size. Please review the standards and indicate the method of window treatments to comply with the requirements where applicable.

8. **Vision Zero.** The project is located on Division Street, identified through the City’s Vision Zero Program as a bicycle high-injury corridor. The sponsor is encouraged to incorporate bicycle safety streetscape measures into the project. Please see the San Francisco Municipal Transportation Authority’s Vision Zero web site: https://www.sfmta.com/projects-planning/projects/vision-zero.

9. **Parking.** Under current zoning (SALI) no parking would be required. This zoning district would have parking maximums, which are listed in Planning Code Section 151.1 if any parking were to be proposed.

10. **Bicycle Parking.** Planning Code Section 155.5 requires this project to provide at least two Class One bicycle parking spaces and two Class Two bicycle parking spaces. Please specify the number and location of these bicycle parking spaces.

11. **Shower Facilities and Lockers.** Please note that Planning Code Section 155.4 requires one shower and six clothes lockers where the occupied floor area exceeds 10,000 square feet of new Trade Shop use space. Should this be the case, please specify the shower facility and lockers location on the plans.

12. **Flood Notification.** The project site is in a block that has the potential to flood during storms. The SFPUC will review the permit application to comment on the proposed application and the potential for flooding during wet weather. Applicants for building permits for either new construction, change of use, or change of occupancy, or for major alterations or enlargements must contact the SFPUC at the beginning of the process to determine whether the project would result in ground-level flooding during storms. Requirements may include provision of measures to ensure positive sewage flow, raised elevation of entryways, and/or special sidewalk construction and the provision of deep gutters. The side sewer connection permits for such projects need to be reviewed and approved by the SFPUC at the beginning of the review process for all permit applications submitted to the Planning Department, DBI, or the Successor Agency to the San Francisco Redevelopment Agency. For
information required for the review of projects in flood-prone areas, the permit applicant shall refer to Bulletin No. 4: http://www.sf-planning.org/ftp/files/publications_reports/DB_04_Flood_Zones.pdf.

13. **Impact Fees.** This project will be subject to various impact fees. Please refer to the Planning Director’s Bulletin No. 1 for an overview of Development Impact Fees, and to the Department of Building Inspection’s Development Impact Fee webpage for more information about current rates.

Based on an initial review of the proposed project, the following impact fees, which are assessed by the Planning Department, will be required:

a. Transit Impact Development Fee (Planning Code Section 411)
b. Eastern Neighborhoods Impact Fees (Planning Code Section 423)

14. **Option for In-Kind Provision of Community Improvements and Fee Credits.** Project sponsors may propose to directly provide community improvements to the City. In such a case, the City may enter into an In-Kind Improvements Agreement with the sponsor and issue a fee waiver for the Eastern Neighborhoods Impact Fee from the Planning Commission, for an equivalent amount to the value of the improvements. This process is further explained in Section 412.3(d) of the Planning Code. Such in-kind agreements and fee waivers are subject to availability of funds, Eastern Neighborhoods Citizen Advisory Committee (EN CAC) recommendation of approval and Planning Commission approval. Early consultation with staff is strongly recommended if you are considering this option.

**PRELIMINARY DESIGN COMMENTS:**

The project is located in the Western SoMa Special Use District. The site is located between freeway overpasses in an area primarily filled with more warehouse and light industrial uses. Heights are between two- to five stories. The following comments address preliminary design issues that may significantly impact the proposed project:

1. **Site Design, Open Space and Massing.** The Department requests that the project provide useable open space as required. This could be located on the roof.

2. **Street Frontage.** The Department suggests increasing active uses at the street frontage by consolidating the bicycle parking and trash enclosure. Please clarify and clearly explain how vehicle loading and trash pickup for the building is proposed to work. No loading should compromise the safety and continuity of the protected bicycle lane fronting the property on Division Street, given its status as a Vision Zero high injury corridor for bicyclists.

3. **Architecture.** The Department supports the project as shown.

---

PRELIMINARY PROJECT ASSESSMENT EXPIRATION:

This Preliminary Project Assessment is valid for a period of **18 months**. An Environmental Evaluation, Conditional Use Authorization, or Building Permit Application, as listed above, must be submitted no later than **June 4, 2017**. Otherwise, this determination is considered expired and a new Preliminary Project Assessment is required. Such applications and plans must be generally consistent with those found in this Preliminary Project Assessment.

3. Project Description

Please Check:
New Construction ☑  Demolition ☑  Alteration ☐  Change of Use ☐  Change of Hours ☐  Other ☐

Describe what is to be done:

Existing single story building to be demolished (1,394.0 Sq.Ft.). New construction constitutes a four story building; ground level will be retail and second to fourth floor will be used by current tenant (Nabi Construction). Per Letter of Determination one third of upper floors will be designated to Accessory use.
Additions to Building: Rear □ Front □ Height □ Side Yard □

Present or Previous Use: Offices of Nabi Construction

Proposed Use: Offices of Nabi Construction, Ground Level Retail Space

4. Project Summary Table

If you are unsure of the final size of the project, provide maximum estimates.

Please describe any additional project features that are not included in this table: The additional spaces will be occupied by the current tenant under Trade Shop and no more than one third is designated to Accessory Use (as per Letter of Determination - see page A0.02 for more details).

Questions:

1. The design currently shows windows on the North elevation facing FWY 101 N. This piece of property is designated as state right of way. Please confirm as part of this assessment that windows on this wall will be permitted?
5. Additional Project Information

Please answer each question to the best of your ability. If the answer is unknown, please state so and provide a brief explanation. Please note that providing more information about the proposed project may result in additional and/or more detailed feedback from the Department.

1. Would the project involve a major alteration of a structure constructed 45 or more years ago or a structure in an historic district? □ YES □ NO

2. Would the project involve demolition of a structure constructed 45 or more years ago or a structure located in an historic district? □ YES □ NO

3. Would the project result in excavation or soil disturbance/modification? □ YES □ NO

   If yes, how many feet below grade would be excavated? +/- 6'-0"

   What type of foundation would be used (if known)? Not Known

4. Is the project site located in an area of potential geotechnical hazard as identified in the San Francisco General Plan or on a steep slope or would the project be located on a site with an average slope of 20% or more? □ YES □ NO

5. Would the project result in ground disturbance of 5,000 gross square feet or more? □ YES □ NO

6. Would the project result in a construction of a structure 80 feet or higher? □ YES □ NO

7. Would the project impact any public property or right(s)-of-way? □ YES □ NO

   If yes, please describe.

8. For any project site that is located on the Maher map or is suspected of containing hazardous materials (based on a previous use such as gas station, auto repair, dry cleaners, or heavy manufacturing, or a site with underground storage tanks):

   Would the project involve soil disturbance of any amount (including grading or minor excavation for utilities) or a change of use from industrial to commercial/residential? □ YES □ NO

   If yes, please describe and provide the amount of soil disturbance in cubic yards. 50 cubic yards

   AND

   If yes, please describe.

   The new structure will be built to the property line with a new foundation & new utilities.

9. Is the project related to a larger project, series of projects, or program? □ YES □ NO

   If yes, please describe.

10. Is the project in a Community Plan Area (for example, Market/Octavia)? If yes, please identify the area.

    Eastern Neighborhoods □ YES □ NO
Estimated Construction Costs

NOTES:

☒ Required Material. Write "N/A" if you believe the item is not applicable, (e.g. letter of authorization is not required if application is signed by property owner.)

☐ Typically would not apply. Nevertheless, in a specific case, staff may require the item.

Some applications will require additional materials not listed above. The above checklist does not include material needed for Planning review of a building permit. The "Application Packet" for Building Permit Applications lists those materials.

No application will be accepted by the Department unless the appropriate items on this checklist is completed. Receipt of this checklist, the accompanying application, and required materials by the Department serves to open a Planning file for the proposed project. After the file is established it will be assigned to a planner. At that time, the planner assigned will review the application to determine whether it is complete or whether additional information is required in order for the Department to make a decision on the proposal.
Acknowledgement and Signatures

OTHER APPLICATIONS THAT MAY BE REQUIRED:
By signing below, I acknowledge: That I have read and completed this form in its entirety; that I understand that receipt of these materials by the Department does not mean that the application has been accepted as complete; that all of the information provided in this application is accurate.

PLANNING DIRECTOR
BULLETIN NO. 4

Review of Projects in Identified Areas Prone to Flooding

Date: APRIL 2007
Reprinted: OCTOBER 2009
References: Administrative Code Section 2A.280-2A.285

PURPOSE:
This bulletin alerts project sponsors to City and County review procedures and requirements for certain properties where flooding may occur.

BACKGROUND:
Development in the City and County of San Francisco must account for flooding potential. Areas located on fill or bay mud can subside to a point at which the sewers do not drain freely during a storm (and sometimes during dry weather), and there can be backups or flooding near these streets and sewers. The attached graphic illustrates areas in the City prone to flooding, especially where ground stories are located below an elevation of 0.0 City Datum or, more importantly, below the hydraulic grade line or water level of the sewer. The City is implementing a review process to avoid flooding problems caused by the relative elevation of the structure to the hydraulic grade line in the sewers.
PERMIT APPLICATION PROCESS:

Applicants for building permits for new construction, change of use, change of occupancy, or major alterations or enlargements will be referred to the San Francisco Public Utilities Commission (SFPUC) at the beginning of the process to determine whether the project would result in ground-level flooding during storms. The side sewer connection permits for such projects need to be reviewed and approved by the SFPUC at the beginning of the review process for all permit applications submitted to the Planning Department, the Department of Building Inspection, or the Redevelopment Agency.

The SFPUC and/or its delegate (SFDPW, Hydraulics Section) will review the permit application and comment on the proposed application and the potential for flooding during wet weather. The SFPUC will receive and return the application within a two-week period from date of receipt. The permit applicant must comply with SFPUC requirements for projects in flood-prone areas. Such requirements may include provision of a pump station for the sewage flow, raised elevation of entryways, special sidewalk construction, and deep gutters.
